

**LOCATION OF WELLBORE (LATERAL) AT SECTION 22 COMPLETION INTERVAL:** The proposed location of the end points of the completion interval will be no closer than 165 feet from the North line and no closer than 330 feet from the East line and no closer than 0 feet from the South line and no closer than 330 feet from the East line of said Section 22;

**LOCATION OF WELLBORE (LATERAL) AT SECTION 27 COMPLETION INTERVAL:** The proposed location of the end points of the completion interval will be no closer than 0 feet from the North line and no closer than 330 feet from the East line and no closer than 165 feet from the South line and no closer than 330 feet from the East line of said Section 27;

**LOCATION OF LATERAL WITHIN THE MULTIUNIT:** No closer than 330 feet from the East line of said Sections 22 and 27, All in Township 7 North, Range 4 West, McClain County, Oklahoma.

2.4 That the Commission should allocate to each of the affected units covered hereby the reasonable drilling, completion and production costs associated with the multiunit horizontal well involved herein and the commingled production and proceeds from the completion interval of such multiunit horizontal well. Based upon the information now available, Applicant is proposing that the allocation factor for each of the affected units involved herein should be determined by dividing the length of the completion interval of the multiunit horizontal well involved herein located in each such affected unit by the entire length of the completion interval of such multiunit horizontal well. In the event the lateral of the multiunit horizontal well involved herein stays within the productive portion of the Woodford and Associated Mississippian and Hunton common sources of supply throughout the drilling of such lateral, then Applicant anticipates that **approximately 50% of the completion interval of such multiunit horizontal well will be located in said Section 22, and approximately 50% of such completion interval will be located in said Section 27**, with the cost of and the production and proceeds from such multiunit horizontal to be allocated between the affected units involved herein based on such percentages. The actual allocation of such costs, production and proceeds may vary depending upon the results of the multiunit horizontal well involved herein.

2.5 That attached hereto as Exhibit "B" and made a part hereof is a map showing the location of each currently existing well in each of the affected units covered hereby and the approximate, anticipated location of the proposed multiunit horizontal well involved herein. If the multiunit horizontal well involved herein is successfully drilled and if the results of such multiunit horizontal well are significant and if the price of natural gas is favorable, Applicant may potentially drill additional multiunit horizontal wells in the affected units covered hereby if such additional wells are approved by the Commission upon the filing of a proper application therefor at a future date.

2.6 That the proposed well, at the location requested by Applicant, is necessary to effectively and efficiently drain a portion of the common sources of supply (reservoir) covered by the drilling and spacing unit comprised of the land set out in Paragraph 4 hereof, which cannot be adequately and efficiently drained by a well drilled at the permitted well location.

2.7 That the entire length of the lateral will be cemented such that the perforations will be isolated from the beginning and end point of the lateral.

3. **LEGAL AUTHORITY:** 52 Okla. Stat. § 87.6 et seq., OAC 165:5-7-6.2 and OAC 165:10-3-28.

4. RELIEF SOUGHT: Applicant requests that the Corporation Commission of Oklahoma enter an order, to be effective as of the date of the execution thereof or as of a date prior thereto, as follows:

(A) Approving a multiunit horizontal well in the 640-acre drilling and spacing units formed for the Shale Reservoir comprised of the Woodford and Associated Mississippian and Hunton common sources of supply in Sections 22 and 27, Township 7 North, Range 4 West, McClain County, so as to allow such multiunit horizontal well to be drilled as described above, and to be completed in and to produce hydrocarbons from the above-named separate common sources of supply, and establishing of a proper allocation factor for allocating the cost of and the production and proceeds from such multiunit horizontal well to each of the affected units covered hereby; and

(B) Granting such other and further relief as may be proper based upon the evidence presented at the hearing herein.

The legal descriptions of the land sections adjacent to the area within which the location exception lies are Sections 14, 15, 16, 21, 23, 26, 28, 33, 34 and 35, Township 7 North, Range 4 West, McClain County, Oklahoma. Applicant further requests that Applicant or some other party be authorized the right to drill said well. Applicant further requests that it be permitted to produce said well at said location from all common sources of supply covered hereby without any downward allowable adjustment.

Respectfully submitted,

MAHAFFEY & GORE, P.C.
