Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

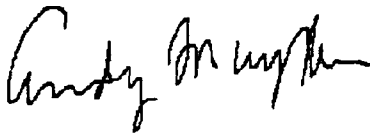

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Andy Murphree

Oklahoma City, OK 73152

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Best wishes,

Meshell McCuen

PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma City, OK 73152

Dear Commissioner Murphy,

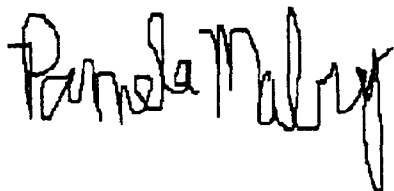

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

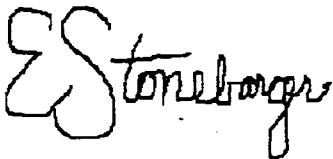

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Randy Hamlett

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Over \$2 billion in economic activity will be generated during construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Dear Commissioner Murphy,

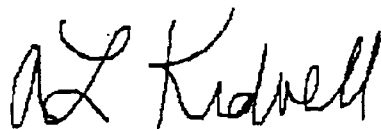

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Over \$2 billion in economic activity will be generated during construction.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

Wind Catcher energy connection is a fantastic opportunity to bring clean wind energy into Oklahoma. Oklahoma is blessed with an abundance of wind and we should put it to use for the benefit of our state. I believe state leaders, like you, should embrace this opportunity to support affordable, renewable energy in Oklahoma.

I have chosen to support this considerable investment in the state for the following reasons:

- Over \$2 billion in economic activity will be generated during construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Chairman Dana Murphy
Oklahoma Corporation Commission
P.O. Box 52000
Oklahoma City, OK 73152-2000

Dear Chairman Murphy:

Re: Application of Public Service Company of Oklahoma (PSO) for Approval of the Cost Recovery of the Wind Catcher Energy Connection Project, Case No. PUD 201700267

I respectfully request that the Oklahoma Corporation Commission **DENY** the application for funding of the Wind Catcher Energy Connection Project, which will place high-voltage transmission lines through our land in Noble County, Oklahoma.

The proposed route of these lines will cross directly over land owned by my family. Our land is a beautiful two-section pasture, which was purchased by my grandfather over 70 years ago. My grandfather, father and uncle have spent their lifetimes raising cattle on our land, which is known as the "Garvie Big Pasture." Once part of the historic 101 Ranch, it is a beautiful Oklahoma ranch.

We do not want to be forced to have 765 KV high-voltage transmission lines going directly across our land. Not only will it destroy our land, but also our children and grandchildren will be subject to potential health hazards that no one talks about. We do not want the money being offered. We want our land to remain as it is.

Thank you for your consideration of how funding this project will negatively affect the landowners and people living in its path.

Sincerely,

Dana (Garvie) Inselman

Oklahoma City, OK 73152

Dear Commissioner Murphy,

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Over \$2 billion in economic activity will be generated during construction.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Katelyn Martin

Oklahoma City, OK 73152

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

Robert Reans

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Best wishes,

Jimmy McKinzie

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$300 million in *ad valorem* property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Regarding Cause No. PUD 201700267 – Application of PSO for Approval of the Cost Recovery for the Wind Catcher Energy Connection Project

Commissioner Murphy,

I am a newcomer to Oklahoma and have been struck about how much fossil fuel industries have been allowed to receive unfair advantages over renewable sources of energy. I attended the public hearing in Oklahoma City to try to educate myself on the culture and politics of renewable energy and attended a day long seminar in Edmond on renewable energy and specifically the Windcatcher Program. Oklahoma is a failed state in the eyes of many independent evaluators and the ongoing teacher walkout is a good example of how the legislature has been influenced by fossil fuel industries. I am very much in support of breaking this very unproductive culture in Oklahoma and I feel the Windcatcher Program is a very good way to begin moving into the future. I understand the pros and cons very well and feel the pros much outweigh the cons. As a retired physician, I know the health concerns around fossil fuels and have spent the last month investigating the Tar Creek Superfund Site. Oklahoma has a huge role in social injustice around mining and fossil fuel production. I strongly urge you to allow the Windcatcher Program to advance and stop the unrelenting bias towards fossil fuels in Oklahoma.

Sincerely,

Carol Merovka, MD

CC:
Bob Anthony, Commissioner
Tom Hiett, Commissioner

April 10, 2018

Chairman Dana Murphy,

I am writing you concerning the WindCatcher Transmission Line that is proposed to cross all of Northwest Oklahoma. I have written you before, but want to ask you one question. Would you like to raise your family next to this monstrous eye sore? My wife and I are raising two small girls, 6 and 8, and I would like for them to have the opportunity to come back after college to raise their family on our place. I fear if this line comes through, they will not get to. Other than destroying our scenic western Oklahoma views, messing with the local wildlife, it will lower our land values so much that they will not be able to afford to live where they were raised. **I am also not so sure of the safety of such a line so close to my home.**

I pray you will vote against this line, as there is a line on Highway 270 south of this proposed WindCatcher line that is available for them to tie into. I guess that makes too much since, tying into an already built line instead of building a new one from Tulsa to the western edge of the Oklahoma Panhandle!

Thank you for taking the time to read my letter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeff Newby', written in a cursive style.

Jeff Newby

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Over \$2 billion in economic activity will be generated during construction.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,
Curtis Bolton

Dear Commissioner Murphy,

Wind Catcher energy connection is a fantastic opportunity to bring clean wind energy into Oklahoma. Oklahoma is blessed with an abundance of wind and we should put it to use for the benefit of our state. I believe state leaders, like you, should embrace this opportunity to support affordable, renewable energy in Oklahoma.

I have chosen to support this considerable investment in the state for the following reasons:

- Over \$2 billion in economic activity will be generated during construction.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

Dear Commissioner Murphy,

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Vickie Strate

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Chris Bargas

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- Over \$2 billion in economic activity will be generated during construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,

Kevin Ward

CUSTOMER COMMENT / DESCRIPTION

To the Oklahoma Corporation Commission:

I am a concerned citizen of Tulsa County. On April 9, 2018 I received a letter in the mail that looked like junk mail. Luckily I opened it and found it was from PSO and that they were contacting me because my property is near or adjacent to the most recent Study Segment of their Wind Catcher Project. The letter informed me that I should come to an open house in Glenpool on April 23, 2018 to find out more information. The letter also provided a PSO website to get more information. On the website I was able to enter my address and the map would pinpoint the actual location of my property within the proposed Study Segment. I was shocked to find that the route followed two sides of my property.

I own a 20 acre executive horse property located at 3511 E 181st South in Bixby Oklahoma which is under contract to be sold with a closing date of May 1, 2018, for the contracted price of \$1,700,00.00. My property is adjacent to the most recent proposed PSO Wind Catcher Study Segment for the proposed electrical route. I do not receive my electric service from PSO. The Bixby area is serviced by East Central Oklahoma Electric Company for electric service.

I did attend the meeting and found out that the new Study Segment adds an additional 10 miles of 140 feet tall, high voltage 765 KV electric towers through Creek and Tulsa Counties. Mainly Bixby is affected with this route, resulting in 40 to 50 of these 140 feet tall, 765 KV, electric towers and lines to be built along the 10 mile route. At the meeting I viewed maps of my property and the proposed routes and Study Segments and was told that the new Study Segment would place the 140 foot 765 KV high voltage electric towers and lines on the property directly next to me and the property directly behind me and that they did not plan on putting the towers directly on my property and so I would have no say so in the process

and no compensation for the loss of value of my property or for me enduring the existence of this tower over my property, generating noise and subjecting me and my family and livestock to health risks. PSO representatives said that the final route will be announced in the next 4 to 6 weeks but that we were encouraged to respond to them in no more than a week with our comments because they were moving forward on the routing. Thus as land owners we do not have adequate time to effectively defend our properties against PSO. We make the case that there are existing electrical towers with existing easements that could be used to place these new 765 KV towers and lines through Bixby. When asked about using the existing lines, PSO replied that it might cause outages and they were looking at the Study Segments for that reason. We have been told by retired PSO Executives that built the original and existing electrical transmission lines in Bixby that that statement is not true.

I am writing to request that you please do not approve this project for PSO. PSO is misinforming the community on the consumer's potential savings on energy. Approximately 70% of the wind energy generated from this project will go out of state or be sold privately. PSO has not shown that there is a need for this additional energy. PSO is not communicating publicly that PSO customers will be paying for this project. PSO is requesting approval for exceptions to rules put in place to protect customers by the Oklahoma Corporation Commission in order to increase rates and their customers to bear the cost of the Wind Catcher Project. We the property owners in Oklahoma are bearing the detrimental hardship of this project with the loss of the value and use of our properties. Property that was carefully conserved by families for future generations. This property is natural habitat for bald eagles, deer and other wild animals that are seen so prevalent in our area.

In my current situation the buyers of my property are backing out of the contract to purchase my home because they do not want the high voltage 765 KV towers in and around their family and home. The placement of these towers will have a significant effect on the value of my property and home.

According to PSO officials at the meeting they are making a final decision in 4-6 weeks on the final route for the 350-370 miles of 765 KV electric transmission lines through the state of Oklahoma. I feel as a property owner affected by this final Study Segment that we are being unfairly treated and that the process is being rushed with us having little time to make a case for ourselves and defend our property. There was very little attendance to the meeting that I attended on April 23, 2018 which makes me suspect that a lot of property owners did not even know about the meeting. A group of property owners from Tulsa and Creek County are scrambling to see what our rights are and how we can work together to have our voices heard.

I respectfully ask that you would allow us the property owners affected the opportunity to state our case before the Oklahoma Corporation Commission. We know time is running out and there is so much at stake for our communities that the people in Arkansas, Louisiana and Texas will never know. Please stand with us as Oklahoma citizens, Oklahoma taxpayers and Oklahoma voters to not let the Wind Catcher Energy project move forward.

Sincerely,

Charleen Brotherton

Subject: Wind Catcher Line 270

This is the complaint letter I sent to the Oklahoma Corporation Commission, Complaint Department.

As you can tell, we are against this. This has a significant impact on us as well as land owners around us and the decedents of us all.

We need all the attention and help on the Wind Catcher Line 270 proposal we can get to get this stopped.

Please let me know if there is anything additional I need to be doing to stop this.

Thank you for your time and attention to this matter.

All the Best,

Mark & Becky Fugett

Subject: Wind Catcher Transmission Line - Joint Stipulation Agreement

Re: PUD 201700267 - Wind Catcher

To the Oklahoma Corporation Commission:

Chairman Murphy, Vice-Chairman Hiatt, and Commissioner Anthony.,

PSO has filed supplement testimony and a Joint Stipulation and Settlement Agreement in the application of PSO for cost recovery for the Wind Catcher project. The latest filing has three signatories; Public Service Company of Oklahoma, Oklahoma Industrial Energy Consumers, and "Wal-Mart" (Wal-Mart Stores East, LP and Sam's East, Inc.). The other signatories have not signed the Agreement.

It is ludicrous that PSO expects the OCC to approve a project based upon a 'non-unanimous' Agreement in which only three of the fourteen signatories have signed! To approve this project based upon this flimsy argument is a slap in the face of the hundreds of landowners who are depending upon the rule of law to prevent big industrial wind energy corporations from riding roughshod over Oklahoma landowner rights. Without the endorsement of the Oklahoma Attorney General and the OCC Public Utilities division, this approval has no merit or legal basis.

Please refuse to approve this project which will not only add costs to PSO's consumers, but will forcibly take valuable agricultural and private land from Oklahoma taxpayers...all for a project whose necessity has been rightly questioned.

Thank you for your consideration and support of all Oklahoma citizens!

Glenda Watkins

CUSTOMER COMMENT / DESCRIPTION

We were just recently notified in the last few days of this project and given very little time (less than 5 days) to research and learn the scope of the project. PSO is proposing a very high voltage electric transmission line that would potentially cover over 1/2 mile of our property in So Tulsa, needless to say this is a huge concern to us. We also have learned that this entire project is very controversial and questionable as to its need and long term viability. Our question is what formal process do we have to go through to protest this project and get in front of the commission to express our concerns. I realize we are somewhat late to this party, but we were just notified and feel that this was intentional on the part of PSO to wait until the final hour to notify the landowners in this area to avoid the protest. There are many people in this area that feel they have been ambushed, kept uninformed, and are the victims of the greed of this large corporation to rush this project through to take advantage of soon to expire tax incentives on an industry being created that has extremely questionable long term viability concerns, even our own Attorney General has spoken out against this project. If you could please let us know as soon as possible what our options are so we can prepare to be heard. We believe this matter is coming before the commission very soon, but cannot get much information to verify anything from Windcatcher as they are very obviously trying to rush this project through to maximize their substantial tax savings.

Very respectful submitted by a spokesperson for a large group of concerned voters and citizens.

CUSTOMER COMMENT / DESCRIPTION

I received notice of this project via letter approximately a week ago. The letter looked like junk mail and was nearly thrown away. It informed me of the plans to run "extra high voltage" power lines straight through the property I share with my family and animals. The "final" meeting and townhall was yesterday evening. This very last minute notice felt like a strategic move on the part of PSO/Windcatcher. It gave us days to learn about this project and what it entailed. Not enough time to prepare for anything. This is incredibly concerning for our family. In the few days I've had to acquire information- it appears to me that this entire project is highly controversial and questionable in terms of it is necessity and it's long term viability. Every person I have spoken with in my area is outraged over the project, and the lack of information provided to us as landowners. It appears to be an intentional withholding of information in order for PSO/Windcatcher to push this project through and avoid any fight or protests from landowners- all for the sake of time and money. One of the things I do not understand is the need for an additional route. Every direction you look there are already power lines out here. Why can these lines not be ran with those existing lines across land that has already been condemned? Why must this project condemn and ruin more land in our great state? Land is the only thing we can not make more of! At this point, I need to know what the formal process is in order to present my concerns to the Comission. I know this project is very rushed and I, as well as the other voters and citizens surrounding me, need to know how get ahead of it.

Petition

STOP THE WIND CATCHER ENERGY PROJECT AND PSO FROM PUTTING MONSTROUS POWER LINES ACROSS OUR LAND!

We are land owners and/or concerned citizens in OSAGE County, Oklahoma where the Wind Catcher Energy Project and PSO are planning to put the monstrous power lines across our land.

We are asking you to vote "NO" and stop the destruction and untenable devaluation of our family farms and ranches. We have a rich legacy in OSAGE County that for many of us predates statehood.

The massive transporter lines will destroy the beauty and serenity of the rolling hills, devalue our livelihoods, and will render an historic schoolhouse (Paxton School) worthless. They likely will even cause physical harm to our families and livestock.

Show the people of OSAGE County that you will recognize and support the small land owners and not the big corporations.

Vote "NO" and stop PSO and Wind Catcher from destroying our land and lives.

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,

Peggy Kraycik

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Over \$2 billion in economic activity will be generated during construction.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,

Jonathan Caudle

P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,

James Barber

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

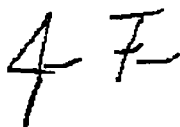

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Justin Fulton

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

Dear Commissioner Murphy,

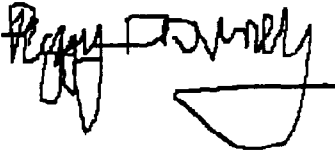

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Debra King King

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

Wind Catcher energy connection is a fantastic opportunity to bring clean wind energy into Oklahoma. Oklahoma is blessed with an abundance of wind and we should put it to use for the benefit of our state. I believe state leaders, like you, should embrace this opportunity to support affordable, renewable energy in Oklahoma.

I have chosen to support this considerable investment in the state for the following reasons:

- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. - 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Mark Werre

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Michelle Stearnes

Oklahoma City, OK 73152

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Kind regards,

Bonnie Brooks

PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Jeff Conwell

- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

Marilyn Masterson

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Over \$2 billion in economic activity will be generated during construction.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Sharon Baitari

Dear Commissioner Murphy,

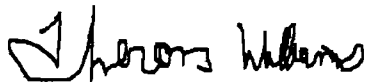

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Dear Commissioner Murphy,

I would like to see our local school districts get the support they need. Wind Catcher Energy Connection will bring millions of dollars in new tax revenue to public schools across northern Oklahoma. I think the state should capitalize on this opportunity to help our schools.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.
- Wind Catcher benefits rural economies across northern Oklahoma and offers hope for long-term economic prosperity in those rural communities.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

William Brummett

Dear Commissioner Murphy,

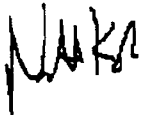

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Over \$2 billion in economic activity will be generated during construction.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

Nathan Koch

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

THE WIND CATCHER PROJECT

Dear Ms. Williams,

The Commission must vote YES on the Wind Catcher Project.

HUMANITY'S FUTURE depends upon developing clean sustainable energy sources like wind & solar.

Oklahoma is a "Top Ten State" for wind & solar development.

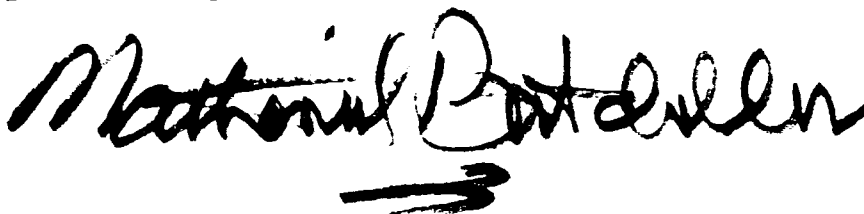

THOUSANDS OF JOBS will result from construction and maintenance of Oklahoma wind turbines – jobs that cannot be exported.

ECONOMIC BENEFITS will flow from the Wind Catcher Project:

- Some \$60 million in new tax revenue during construction;
- Some \$300 million in property taxes for state needs;
- Payments to land-owners where turbines will be sited.

ALL FORMS OF ENERGY ARE NEEDED to meet humanity's growing needs. Development of Oklahoma's wind energy benefits our state, and in no way curtails dependence upon oil and gas.

Sincerely,

2,400 Peace House members & friends advocate for ALL policies and regulations supporting environmental sustainability.

Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Demetrice Britton

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Best wishes,
Ryan Goodrich

Dear Commissioner Murphy,

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- With the addition of Wind Catcher energy, PSO customers will receive 40% of their energy from Oklahoma wind.
- Wind Catcher is expected to save customers money each year that it is in operation. It will be the lowest cost energy on PSO's system.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.
- Wind Catcher is investing in Oklahoma without receiving any subsidies from the state of Oklahoma.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

Wind Catcher Energy Connection is an important project for Oklahoma. The project will benefit rural northern Oklahoma by creating jobs, increasing tax revenue and stimulating over \$2 billion dollars in economic activity. I want to see my community and the rest of the state grow and prosper. Multi-billion dollar investments don't happen every day and when the state has an opportunity to be part of one, we should all stand behind it in support.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$300 million in ad valorem property taxes will be paid by the company over the life of the 25-year project. These taxes will benefit schools and help fund county services.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

In gratitude,

Sabrina Adams

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

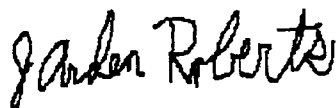

I'm writing to ask you to vote in support of the Wind Catcher Energy Connection project. The \$4.5 billion investment combines new wind energy with a dedicated generation interconnection to reliably deliver affordable energy to customers. PSO customers will benefit from very low-priced Oklahoma wind energy and communities will benefit from new tax revenues and jobs. I have chosen to support this important project for the following reasons.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.
- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Local school districts along the power line route will see increased revenue from the project benefiting Oklahoma's students and teachers.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Sincerely,

John Roberts

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

Wind Catcher energy connection is a fantastic opportunity to bring clean wind energy into Oklahoma. Oklahoma is blessed with an abundance of wind and we should put it to use for the benefit of our state. I believe state leaders, like you, should embrace this opportunity to support affordable, renewable energy in Oklahoma.

I have chosen to support this considerable investment in the state for the following reasons:

- 8,400 direct and indirect jobs will be created within the next four years during the construction process. With 80-90 long-term jobs created after construction.

Commissioner Murphy
P.O. Box 52000
Oklahoma City, OK 73152

Dear Commissioner Murphy,

At \$4.5 billion, Wind Catcher would be one of the largest investments in our state. Additionally, Wind Catcher will not receive a dime in subsidies from the state of Oklahoma to build or operate this project. This seems like a straightforward opportunity to add jobs, tax revenues and low cost energy. It's great news for our state and I urge you to approve PSO moving forward with the project.

I have chosen to support this considerable investment in the state for the following reasons:

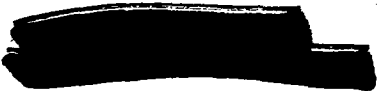

- \$65 million in new state and local sales and income taxes will be generated during construction in the next four years.
- Over \$2 billion in economic activity will be generated during construction.
- The state is already starting to receive benefits from the project. Organizations involved with the project have developed scholarship programs to help students train and prepare for successful careers in the wind industry.

For the aforementioned reasons, I sincerely support and endorse Wind Catcher Energy Connection and the benefits that it will bring to Oklahoma. Oklahoma cannot afford to miss out on this opportunity to invest in our state and the citizens of Oklahoma. I would like to thank the Oklahoma Corporation Commission for their thoughtful consideration on this matter.

Respectfully,

Ryan Palovik

RECEIVED
SEP 27 2013
REGULATORY
DIVISION

RE: Regarding Cause No. PUD 201700267

**Attention: Chairman Dana Murphy, Vice Chairman Tim Hiatt,
Commissioner Bob Anthony**

**I am writing this letter in opposition to the Wind Catcher
Energy Connection Proposed Powerline**

Our family has opposed similar projects in the past

**The family ranch is an Oklahoma Historical Centennial Ranch
Settled by my Grandfather in 1883 "James Sargent Beasley"**

**We are trying to keep it altogether so can be handed down to
another Generation, but it is very hard to do as we already had
a big portion of land taken away from us thru condemnation for
Optima Dam which was a disaster, and the highways have taken
land, and now the Wind Energy Companies are trying to take
land away for Powerlines which we refuse to sign any contracts
or surveys to allow them to survey**

**I understand that these big power lines can cause cancer and
other health problems.**

**The people in charge of this project are not interested in our
health or our lives or the lives of our livestock and farming**

**It seems like thru the past 100+ years there has been someone,
somewhere wanting to take control of our Ranch, we are not in
the business of giving up our property without a fight**

**These people has ignored us, trespassed on our property, cut
fences, left gates open, cut chain links on locked gates, and let
our cattle get out plus run all over property without permission.**

**They have told lies to me, and told lies about me to the
neighbors, and I am very angry about all of this and not going to
put up with it anymore, also to my knowledge there has been no
open public meetings on this matter in Texas County, Okla.**

I understand that there are other states in U.S.A. that has similar problems with Eminent Domain, we need to get this law changed, As all things, such as TOWNS GROWING, PARKS OF ALL KINDS, TAKING LAND FOR RECREATION PROJECTS, WIND PROJECTS, OIL AND GAS, AND PIPE LINES, ETC.

Taking in consideration of all projects, We are depleting land that is so valuable for production of some sort such as CATTLE, GRAINS & VEGETABLES.

What has happened to all our land rights that we used to have. It's not right that any company or companies, big or little, neither government Local or National Level has the right to come in and take our land that we have been fighting for generations.

It seems that if a company or companies want to do something that concerns "our" land they can go get "THE POWER OF EMINENT DOMAIN" and take what they want. If I come to you and tell you that I want to put something in or on your property that you was very much against and said no to, so all I have to do is go get approved for "THE POWER OF EMINENT DOMAIN" and take it. I don't think you'll would be to happy.

Why does the Corporation Commission have all the say about this What has happened to the rights that the land owner has.

This does not mean that since we are few in numbers that we are not proud to be landowners and we will fight to the end.

Legal S/E ¼ 5-3-10

Respectfully
Beasley Ranch
Murry & Sandra Beasley

Reference: PUD201700267 Wind Catcher Project

Dear Commissioner Heitt:

I would like to voice my opposition for PSO's Wind Catcher Energy Connection Project. The PSO Wind Catcher Energy Connection Project is bad for Oklahoma. PSO is misinforming the community and consumers on the consumer's potential savings on energy costs. Approximately 70% of the wind energy generated from this project will go out of state to Arkansas, Louisiana and Texas or be sold privately. PSO has not shown that there is a need for this additional energy. PSO is not communicating publicly that PSO customers will be paying for this project. PSO is requesting approval for exceptions to rules put in place to protect customers by the Oklahoma Corporation Commission in order to increase rates and their customers to bear the cost of the Wind Catcher Project. Both private and public land will be condemned for the greed of big corporations.

Wind power energy is becoming less favorable all over the country and even in Oklahoma. With the PSO Wind Catcher Project there will be a 300,000+ acre wind farm constructed in the Panhandle of our State with over 800 windmills to be built. The construction of this wind farm will cause an unprecedented destruction of tens of thousands of acres of natural habitat for which the wild life in the state of Oklahoma depend on. To transport the power from the Oklahoma Panhandle to Arkansas, Louisiana and Texas there will be 350 miles of high voltage, 140 feet tall, 765 KV electric towers and multiple power lines running through out Oklahoma. Towers and lines ran through our Oklahoma family farms, ranches and homesteads destroying farming, ranching and obstructing views and seriously reducing property values. Lower property values means reduced property taxes for the State of Oklahoma.

For the aforementioned reasons, I do not support the Project and respectfully ask that you please vote no against the PSO Wind Catcher Connection Energy Project.
Sincerely,

Ronald Scott

CUSTOMER COMMENT / DESCRIPTION

Dear Commissioner Murphy:

I would like to voice my opposition for PSO's Wind Catcher Energy Connection Project and the Cost Recovery Aspect. The PSO Wind Catcher Energy Connection Project is bad for Oklahoma. PSO is misinforming the community and consumers on the consumer's potential savings on energy costs. Approximately 70% of the wind energy generated from this project will go out of state to Arkansas, Louisiana and Texas or be sold privately. Therefore, PSO has not shown that there is a need for this additional energy. PSO is not communicating publicly that PSO customers will be paying for this project. PSO is requesting approval for exceptions to rules put in place to protect customers by the Oklahoma Corporation Commission in order to increase rates and their customers to bear the cost of the Wind Catcher Project. Both private and public land will be condemned for the greed of big corporations.

Wind power energy is becoming less favorable all over the country and even in Oklahoma. With the PSO Wind Catcher Project there will be a 300,000+ acre wind farm constructed in the Panhandle of our State with over 800 windmills to be built. The construction of this wind farm will cause an unprecedented destruction of tens of thousands of acres of natural habitat for which the wild life in the state of Oklahoma depend on. To transport the power from the Oklahoma Panhandle to Arkansas, Louisiana and Texas there will be 350 miles of high voltage, 140 feet tall, 765 KV electric towers and multiple power lines running through out Oklahoma. Towers and lines ran through our Oklahoma family farms, ranches and homesteads destroying farming, ranching and obstructing views and seriously reducing property values. Lower property values means reduced property taxes for the State of Oklahoma.

For the aforementioned reasons, I do not support the Project and respectfully ask that you please vote no against the PSO Wind Catcher Connection Energy Project.

Dear Commissioner Murphy:

I would like to voice my opposition for PSO's Wind Catcher Energy Connection Project. The PSO Wind Catcher Energy Connection Project is bad for Oklahoma. PSO is misinforming the community and consumers on the consumer's potential savings on energy costs. Approximately 70% of the wind energy generated from this project will go out of state to Arkansas, Louisiana and Texas or be sold privately. PSO has not shown that there is a need for this additional energy. PSO is not communicating publicly that PSO customers will be paying for this project. PSO is requesting approval for exceptions to rules put in place to protect customers by the Oklahoma Corporation Commission in order to increase rates and their customers to bear the cost of the Wind Catcher Project. Both private and public land will be condemned for the greed of big corporations.

Wind power energy is becoming less favorable all over the country and even in Oklahoma. With the PSO Wind Catcher Project there will be a 300,000+ acre wind farm constructed in the Panhandle of our State with over 800 windmills to be built. The construction of this wind farm will cause an unprecedented destruction of tens of thousands of acres of natural habitat for which the wild life in the state of Oklahoma depend on. To transport the power from the Oklahoma Panhandle to Arkansas, Louisiana and Texas there will be 350 miles of high voltage, 140 feet tall, 765 KV electric towers and multiple power lines running through out Oklahoma. Towers and lines ran through our Oklahoma family farms, ranches and homesteads destroying farming, ranching and obstructing views and seriously reducing property values. Lower property values means reduced property taxes for the State of Oklahoma.

For the aforementioned reasons, I do not support the Project and respectfully ask that you please vote no against the PSO Wind Catcher Connection Energy Project.

Sincerely,

Ronald Scott

Subject: Wind Catcher Project and PSO High Voltage Electrical LINE

I see where Walmart has joined with the PSO in their fight to get the permits for crossing our beautiful state! What gives these two GIANT CORPORATIONS with no ROOTS TO OKLAHOMA the ability to choose the destiny for our land, our legacy for our future generations! I have lived my entire 69 years among Native Americans. I have never had any problems with them. We live on what was once the Ponca Reservation. As a 4th Grade teacher, I loved my ALL MY CHILDREN, no matter what color they were! They have a SOVEREIGN NATION and no one ever tries to lay a pipe line or electric line over them. I believe that is what farmers need to become. In fact, this will be my next project.

Give us back the control of our LAND

Completely Upset,
John Aaron & Burdetya Linn

Dear Commissioner Murphy:

I would like to express my concerns about PSO's Wind Catcher Project. I found out, with not very much notice, that PSO was going to construct a 765 KV line, that was going to pass near my property. I attended a Open House meeting on April 23, 2018, and I soon realized the need to do more research, and did so. The things I found astonished me. Having retired from PSO's Engineering department as a draftsman, eventually becoming supv./mgr. of the department. In the 1960's and 70's I worked with engineers and survey data, to prepare Plan & Profile drawings used for the construction of transmission lines. So I can appreciate the enormity of a 765 KV line. At that time, I just remember the transmission lines going mainly across pasture and timberland, not through residential areas, as this route through southern Tulsa County does. There are some expensive homes in this area, whose value is going to be adversely affected, if approved. Land values in this area have been selling for around \$1,800.00 to \$2,000.00/acre. That land could drop in value to \$4,000.00 or less/acre, with the presence of this transmission line, according to realtors in the area. And I doubt anyone knows the impact on the health of individuals living near these lines, caused by greater electromagnetic fields, created by these EXTRA HIGH VOLTAGE LINES.

After starting my research, I realized this project should be a concern for all Oklahoman's, for the following reasons. As you know, our state has been in dire straights recently causing a teacher walkout. My daughter, being a teacher brought my attention to this matter. What I found, as I did this research, was that the wind power industry is a partial cause. It receives a 5 year exemption from property taxes, (I understand that this was recently changed to 3 years). In May 2016, the state had to borrow \$5 million from other funds to pay refunds due corporations, including \$3.3 million in zero emission credits. According to the Tax Committee, the subsidy for wind production was nearly \$74 million in 2016. Another source estimates it at \$88.2 million in 2016, increasing to \$133.8 million in 2017. The 5 year exemption from property taxes cost the state \$1 million in 2004 and has risen to \$60 million in 2017. There's also an exemption of sales tax and a 15 year investment tax credit based on up to 2% of the cost of depreciable property. The investment tax credit has now expired. PSO claims the Wind Catcher will save their customers \$2 billion over 25 years. Other sources claim it will cost consumers \$320 million. I was also surprised to find that 37% of Oklahoma's wind company ownership is foreign owned. Only 7% of wind company ownership is Oklahoma based.

In summary , I believe this is a bad undertaking that impacts the state of Oklahoma, because of the financial crises they are facing. It seems as though the citizens of this great state are paying the price in environmental impact for only 30% of the energy produced by it.

Do I have any animosity toward PSO, having retired from there after 39 years of service? Not at all. I like the employees there. I just think the leaders have been duped by the wind industry and it would be hard to justify the project, without these tax incentives.
