Tulsa, OK 74136

Guest Petroleum, Inc.
P.O. Box 805,
Edmond, OK 73083

Singer Oil Company
P.O. Box 30
Hennessey, OK 73742

RKR Exploration, Inc.
P.O. Box 1608
Seminole, OK 74818
2. Allegation of Facts:

(A) The price of Oklahoma crude oil has crashed during the last 3 months from a high of almost $60 per barrel to at or under $20 per barrel.
(B) The world crude oil market is being artificially manipulated and impacted by other large oil producing countries, the public health emergency arising from the Covid-19 coronavirus pandemic and other external events.
(C) The price of crude oil in Oklahoma and elsewhere is not being set by free markets.
(D) There is no correlation in Oklahoma between the price Oklahoma crude oil is being bought and sold at today and its actual value.
(E) The production of Oklahoma crude oil is occurring while there is no current market demand for Oklahoma crude oil at the wellhead at a price equivalent to the actual value of such Oklahoma crude oil.
(F) The production of Oklahoma crude oil is occurring in such a manner that the cost of recovering Oklahoma crude oil exceeds the value of the Oklahoma crude oil to be recovered.
(G) The taking of Oklahoma crude oil or petroleum is currently occurring while there is not market demand at the well at a price equivalent to the actual value of such Oklahoma crude oil or petroleum.
(H) The waste of Oklahoma crude oil is occurring.
(I) The production and sale of Oklahoma crude oil below its actual value, and in a manner that constitutes waste, adversely impacts royalty owners, working interest owners, oil and gas operators, and others, not to mention the State of Oklahoma, not only by the substantial loss of tax revenues, but as the largest mineral owner in the State.
(J) The Corporation Commission not only has the authority to determine whether waste is occurring and Oklahoma crude oil is being taken and sold below its actual value, it has the duty and obligation to prevent the waste of Oklahoma crude oil and prevent it from being taken and sold below its actual value.

3. Legal Authority: 52 O.S. Sections 86.1 et seq. and Sections 271 et seq.; OAC 165:10-5-1 et seq.

4. Relief Sought: Wherefore, premises considered, Applicant requests the Corporation Commission enter an order determining that the waste of Oklahoma crude oil is occurring, determining that there is not market demand at a price equivalent to the actual value of the Oklahoma crude oil or petroleum being taken, and by adjusting, modifying, amending, setting or establishing allowables for the production of Oklahoma crude oil or petroleum, providing for the proratining of the production of Oklahoma crude oil or petroleum, or the granting
such other relief as may be appropriate and necessary for the prevention of the waste of Oklahoma crude oil or petroleum and the taking of Oklahoma crude oil or petroleum at less than its actual value.

Respectfully submitted,

[Signature]
