The Oklahoma Corporation Commission deems it to be in the best interest of land owners and					
mineral owners to clear mineral titles where possible for surface lands where old records show					
here has been drilled oil and/or gas wells but for which no record has been filed for the plugging					
of the well. The absence of an official plugging record prevents a clear mineral title in cases of					
recorded drilling activity.					
This document, when properly completed,	will serve	as a substi	tute for a n	luggina record in
