The Oklahoma Corporation Commission deems it to be in the best interest of land owners and mineral owners to clear mineral titles where possible for surface lands where old records show there has been drilled oil and/or gas wells but for which no record has been filed for the plugging of the well. The absence of an official plugging record prevents a clear mineral title in cases of recorded drilling activity.

This document, when properly completed, will serve as a substitute for a plugging record in Oklahoma Corporation Commission well log record files.

A physical search of the above described land was made and the findings are:

- [1] No evidence of any well.
- [2] Evidence of the well and found it to be plugged in accordance with rules in force at the time of plugging.
- [3] Evidence of unplugged well;  Producing  Non-Producing
